HTML5
CSS3
JavaScript
PHP
SQL
Node.js
Express
Pug
MongoDB

Programming Languages

Java
Swift

Digital Design

Photoshop
Illustrator
InDesign
Digital photography

Foreign Languages

Spanish
Japanese

Projects

Thrift Spending Tracker

September 2018 – Present

- Making spending tracking easier with a web application made with Node.js, Express, and MongoDB
- Using technologies such as JavaScript (ES6), HTML templates (Pug/Jade), and Git
- Implementing the Model-View-Controller architectural pattern, async + await, and user authentication

100 Days of Code

August 2018 – Present

- I code every day, working on projects, expanding my skills, blogging, and making connections in the industry

Challenge Channel Productivity Site

September 2016 – December 2016

- Designed the web application, incorporating my knowledge of typography, color, and design principles
- Implemented my design with HTML5, CSS3 (SASS), and Bootstrap
- Presented the completed project to an audience in a professional setting

Experience

Education

Bachelor's Degree

University of Rochester
Graduated 2017
cum laude with distinction
GPA 3.79 (3.90 in Computer Science)

Study Abroad

Madrid, Spain

Relevant Coursework

Web Application Development
Advanced Front End Web Development
Web Design and Development
Data Structures and Algorithms
iOS Application Development

Current Book

Mary Queen of Scotland and the Isles
Margaret George

Junior Analyst

ArtSci Health Solutions, Sparta NJ

August 2017 – Present

- Responsible for everything technology:
- Maintain website and social media (LinkedIn, Twitter, email campaigns)
- Create, code, and design additional websites for conferences
- Use Photoshop, Illustrator, InDesign and other Adobe Creative Cloud apps to design everything from branded folders to executive summary layouts
- Conduct market research, write reports and executive summaries, communicate with clients, and maintain an organized database

Web Developer

Warner School of Education, Rochester NY

May 2016 – November 2016

- Used PHP and SQL to create new features for the website, such as the search bar on the courses page
- Worked with a technology stack based on MySQL, PHP, and jQuery with a custom CMS
- Redesigned old webpages using HTML5 and CSS3 to implement design principles like hierarchy and rhythm
- Made design and layout decisions and advised the team on UI strategies

Web Design Teaching Assistant

University of Rochester Computer Science, Rochester NY

January 2014 – May 2015

- Gained expertise in HTML5 and CSS3 and precise knowledge of coding and style standards
