Education

University of Rochester, Rochester, NY

May 2017

BA in Japanese, minors in Computer Science and Spanish

Graduated cum laude with distinction

GPA 3.79/4.00 (3.90 in Computer Science)

Awards & Achievements: Dean's List all eligible semesters, Steven Harrison Scholarship, Rochester National Grant

Institute for the International Education of Students, Madrid, Spain

January 2016 – May 2016

Awards & Achievements: Lynne Miller Study Abroad Fund recipient, photography contest winner

Relevant Coursework:

iOS Application Development, Web Programming, Advanced Front End Web Development, Science of Programming, Data Structures

Experience

Web Developer | Warner School of Education, Rochester, NY

May 2016 – November 2016

- Redesigned old webpages using HTML5 and CSS3 to implement design principles like hierarchy and rhythm
- Made design and layout decisions and advised the team on UI strategies
- Worked with a technology stack based on MySQL, PHP, and jQuery with a custom CMS
- Used PHP and SQL to create new features for the website, such as the search bar on the courses page

Digital Marketing Intern | Imaste, Madrid, Spain

February 2016 – May 2016

- Used blogging, social media, and LinkedIn to successfully and innovatively brand the company
- Developed the company's online marketing strategy with a team in a fully Spanish-speaking work environment
- Translated content from Spanish to English for online and eBook publication

Web Design Teaching Assistant | University of Rochester Computer Science Dept.

January 2014 – May 2015

- Gained expertise in HTML5 and CSS3 and precise knowledge of coding and style standards
- Debugged code and graded coding assignments for about 12 undergraduate students per semester
- Provided insight and worked with the professor to develop the evaluation and grading process for the course

Projects

Challenge Channel Productivity Site

September 2016 – December 2016

- Designed the web application, incorporating my knowledge of typography, color, and design principles
- Implemented my design with HTML5, CSS3 (SASS), and Bootstrap; connected to my team's code using GitHub
- Presented the completed project to an audience in a professional setting

iOS Laundry Request App

September 2016 – December 2016

- Coded a mobile app in Swift for a small-scale laundry business venture
- Managed the project, which included elements such as localization, custom table cells, and persistent data, and presented to an audience when finished

Skills

Web Development:

HTML5, CSS3, Bootstrap, PHP, JavaScript, jQuery, SQL, WordPress

Programming Languages:

Java, Swift, C, Scheme

Digital Design:

Adobe Photoshop, Adobe Illustrator, digital photography

Foreign Languages:
